PROFESSIONAL SUMMARY

Senior Mobile Engineer (8+ years) with a track record of delivering high-performance Android and Flutter applications. Pioneer in AI-driven development workflows, leveraging autonomous agents and LLMs to accelerate delivery cycles by up to 30%. Expert in Clean Architecture and Kotlin Multiplatform (KMP). I help companies bridge the gap between complex business requirements and production-ready mobile solutions through intelligent automation and senior-level technical leadership.

CORE SKILLS

Mobile Development

- Android (Kotlin, Jetpack Compose)
- Flutter (Mobile & Web)
- Kotlin Multiplatform (KMP)
- Clean Architecture, MVVM
- Modular and scalable mobile systems

AI-Driven Mobile Engineering

- Design and integration of AI-powered mobile features (chat, smart forms, content generation)
- Secure **LLM API integration** (OpenAI, Gemini)
- Reduced technical refactoring, testing, and documentation time by 30% through AI-assisted autonomous workflows
- LLM-based feature design (chat, assistant, intelligent forms)
- Privacy-aware and scalable AI feature design
- Designing and deploying autonomous agents for continuous UI/UX testing and automated bug reporting

Kotlin & Android Stack

- Coroutines & Flow
- Retrofit / Ktor
- Dependency Injection (Koin, Dagger)
- State management and performance optimization
- Firebase Cloud Messaging (FCM)

Testing, DevOps & Tools

- Unit and UI testing (ViewModel, business logic, Compose UI)
- CI/CD pipelines (Azure DevOps, AppCenter)
- Git (GitHub, GitLab)

- REST APIs, JSON, Swagger

Collaboration & Product

- Agile methodologies (Scrum, Kanban)
 - Code reviews and mentoring
 - Cross-functional collaboration (Design, QA, Product)
 - UI/UX optimization (Figma, Jira, Confluence)
-

PROFESSIONAL EXPERIENCE

PROXYM MIDDLE EAST – Dubaï (Remote)

Senior Android & Flutter Developer | June 2024 – Present

- Led refactoring and modernization of legacy Android codebases, improving stability and maintainability.
- Designed and implemented modern Android architectures using **Jetpack Compose** and Clean Architecture.
- Delivered new features and maintained large-scale enterprise and public-sector mobile applications.
- Leading the transition to Kotlin Multiplatform (KMP) to share 60% of business logic between Android and iOS.
- Led cross-functional efforts to automate QA and AI-driven refactoring, slashing technical debt and crash rates.
- Supervised release cycles and Play Store deployments.
- Architected and integrated LLM-driven mobile features, enhancing user engagement through proactive AI assistants.
- Built a custom Python-based AI agent to automate regression testing on physical devices, reducing manual QA intervention

Tech stack: Kotlin, Jetpack Compose, Coroutines, Ktor, Retrofit, Koin, Firebase, HERE Maps, Play Store, App Gallery, Google MLKit, Huawei ML Kit, WebSockets, GitHub, Python

SCHNEIDER ELECTRIC – France (Remote)

Android Technical Lead | May 2023 – March 2024

- Provided technical leadership and architectural support for Android applications.
- Integrated new modules and maintained CI/CD pipelines via Azure DevOps.
- Conducted code reviews, testing, and Play Store releases.
- Improved build automation efficiency and overall code quality.
- Used AI-assisted development to accelerate troubleshooting and refactoring.

Tech stack: Kotlin, Java, Coroutines, RxJava, Python, Azure DevOps, AWS, AppCenter

DIGITSOLE – France (Remote)

Lead Android Developer | May 2021 – June 2022

- Migrated backend services from Firebase to AWS and redesigned the Android UI.
- Implemented OAuth 2.0 authentication, real-time audio features, and push notifications.
- Reduced crash rate and improved overall application performance.

Tech stack: Kotlin, Koin, Room, RxJava, AWS Amplify, Firebase, Google Maps

WIMOBİ – Tunisia

Senior Android & Flutter Developer | Jan 2017 – May 2021

- Designed and developed Android, iOS, and Flutter applications across multiple industries.
- Managed the full mobile development lifecycle from design to production.
- Delivered more than 10 production apps with high stability and performance.

Tech stack: Kotlin, Java, Flutter, Swift (UIKit), Firebase, REST APIs, AWS

TRANSLATLY – CodeCooperation GmbH – Germany (Remote)

Flutter Developer | Dec 2020 – Aug 2021

- Developed real-time translation applications with secure communication architecture.
- Integrated audio and video features using Twilio.
- Improved latency and overall user experience.

Tech stack: Flutter, Dart, Twilio, Sqflite, GitHub

SELECTED PRODUCTION PROJECTS

- [**Dubai Chamber App**](#) – Business services platform (Led Android, AppGallery, Kotlin, REST)
 - [**Maskan \(Play Store\)**](#) – Real estate app (Led Android, Rest)
 - [**Digitsole \(France\)**](#) – Smart footwear tracking (Led Android, Bluetooth, AWS)
 - [**Gesundheitspersonal \(Germany\)**](#) – Healthcare staff management (Led Android, Firebase)
 - [**mySchneider \(Play Store\)**](#) – Catalog, QR/barcode scanning, order tracking, expert chat (Led Android, Kotlin, QR Integration)
-

EDUCATION

Bachelor's Degree in Computer Technology (2013)

Higher Institute of Technological Studies of Sousse, Tunisia

CONTINUOUS LEARNING & PROFESSIONAL DEVELOPMENT

- Android Jetpack Compose (Udemy – self-paced)
 - Advanced Flutter UI (Coursera – self-paced)
 - AWS Amplify & Firebase for Mobile Applications
 - [Generative AI for Developers – DeepLearning.AI](#)
-

LANGUAGES

Languages: French (C1) • English (C1) • Arabic (Native) • German (A2 – currently improving)
